# THUMB COAST STORM DRAIN ART PROJECT

## SCHOOL EDITION

Student Art With An Environmental Message

[scriver.org/StormDrainProject](http://scriver.org/StormDrainProject)

The Thumb Coast Storm Drain Art Project consists of 24 painted storm drain murals in Port Huron, St. Clair, and Marine City by artists of all skill levels and ages. These murals bring awareness to the connectivity between storm drains, pollution, and water quality. A painted storm drain reminds us what gets washed into drains ends up in our rivers untreated.

Friends of the St. Clair River is looking for **schools** interested storm drain murals to provide **students** with a creative opportunity for environmental stewardship, civic engagement, and art skills. Students will be able to design and paint storm drain murals on school property with supplies, training and mentorship provided at no cost. Email [info@scriver.org](mailto:info@scriver.org).
